

# FE 20% Ferrous Sulfate

## Guaranteed Analysis:

Sulfur (S) .....12.0%  
Iron (Fe) .....20.0%

Derived from: Ferrous Sulfate Heptahydrate.

Fe 20% Ferrous Sulfate is intended for agricultural use for plant nutrition. Provides Iron and Sulfur. Used on a wide variety of crops as a supplement to a complete nutritional program.

## DIRECTIONS FOR USE:

Fill mixing vessel halfway, then add Fe 20% Ferrous Sulfate, then agitate while adding remaining water. Add desired fertilizers. Add herbicides last while continuing to agitate tank contents. Spray solution as soon as possible. Waxy leaf plants: 12 ounces (355 mL) of a non-ionic wetting agent per 100 gallons (380 mL) of finished spray will aid leaf penetration. Fe 20% Ferrous Sulfate tank mixes are generally stable; however, agitate prior to spraying if mix has been standing for over 24 hours. Use sufficient water for good coverage. For optimum results, do not apply water for at least 4 hours following application. Do not apply to flower buds or blossoms of flowers, shrubs and trees.

## COMPATIBILITY WITH OTHER MATERIALS:

Fe 20% Ferrous Sulfate is most effective when plants are growing rapidly. Fe 20% Ferrous Sulfate is least effective when plants are dormant or suffering from stress. Fe 20% Ferrous Sulfate is compatible with most pesticides and fertilizers, with the exception of amine formulation herbicides and high phosphate fertilizers. Tank mixes with amines should not be attempted unless adequate agitation exists. Do not premix Fe 20% Ferrous Sulfate with any high-pH herbicides without performing a jar test.

**Warning:** This product contains a chemical known to the State of California to cause cancer, birth defects or other reproductive harm. Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, requires notification of potential exposure to substances identified by the State of California as causing cancer, birth defects or other reproductive harm.
